

# Spec 1.0

## MVP Goal :

**An application that allows any teacher to create and launch their online lessons.**

## MVP Timeline :

**3 weeks from now : 24th of Feb**

## User groups :

- Teachers create their class
- Students access the class through invite link (they can only start using the app when they have an invite)

## MVP Features:

### Setting up :

1. Login Authentication for teacher
  1. Either through phone number otp or email
2. Teacher is then prompted to Add name with login credentials
3. If no prior classrooms, teacher gets prompt to create a **NEW ROOM:**
  1. Room name
  2. Description of room
  3. Calendar schedule for the class

4. If classrooms exist, those will be displayed
  1. A +/add icon to create new classrooms, repeat step 3
5. Each class to have a unique url

## **Navigating through a classroom :**

Like a web browser, the classroom will have different tabs for specific functions:

1. overview of the class
  1. Number of students
  2. class schedule
  3. Go live - to start live lesson
  4. Shareable url link for students to enter
  5. The tutor should have control of who to allow on the platform - once the a student clicks on the url
2. Tab to see enrolled students
3. Tab to upload resources
  1. Documents - prescribed reading
  2. Pre-recorded videos
4. Community thread
  1. Forum to disperse info/ discuss topics
  2. Simple chat like functionality
5. Assignment tab :
  1. Additional tab if homework submission is part of the class

## **Big Plus:**

1. Integrating a payments feature
  1. Something like an e-wallet facility

## Student facing experience:

1. Student can only access when he/she has a given classroom URL
2. Students can chat on the community tab
3. Students can upload documents on homework tab
